This is an alphabetical list of independents and companies with Idaho State Licensed Backflow Assembly Testers who have registered to test in Dalton Water's boundaries. The Association does not accept any responsibility/liability for, or endorse any, licensed testers on this list.

BACKFLOW TEST SUBMISSION DEADLINE MAY 15TH

Request that your backflow tester immediately submit your backflow test report to Dalton Water by either email, fax, mail, hand deliver to the office, or drop into the payment box next to the Dalton Gardens' City Hall entrance.

Please be mindful that most backflow assemblies can be tested at any time as long as it is before the May 15th deadline since they are always connected to running water source.

Backflow assemblies are NOT required for sprinkler systems "ONLY" connected to Dalton Gardens Irrigation Dist. or Schloss Irrigation systems, or other non-potable/drinking water sources, i.e. wells or ponds.

DALTON WATER WILL ELIMINATE ALL CROSS CONNECTIONS BY JUNE 30, 2023.

Examples: 1) sprinkler system connected to Dalton Water's domestic/drinking water system & to any other water source (i.e. irrigation system, well, or pond), or 2) pools/fountains/water features connected to Dalton Water's domestic/drinking water system and to any other water source.

DALTON WATER REQUIRES A PREMISE-ISOLATION BACKFLOW ASSEMBLY FOR PROPERTY OWNERS WITH POOLS, PONDS, AND/OR WATER FEATURES.

Visit our website for additional backflow or system information. For questions, please feel free to contact our office during the business hours listed below

Office address: 6360 N. 4th St., Dalton Gardens, ID 83815
